NOVELTY:

Claims 1-7:

- US 2003/0196658 A1
- ♦ WO 1998/004310 A1
- EP 1258266 A1
- EP 0427474 A2
- US 5441046 A
- WO 2001/097893 A1

The claimed invention lacks novelty in view of a large number of documents. The art is replete with suggestions and disclosures of a cushion for a patient interface adapted to supply gas to a patient as presently defined. The above documents are provided as examples chosen from many in a well traversed art.

For example EP 0427474 A2 discloses a cushion for a patient interface adapted to supply gas to a patient comprising a cushion body and an outer cover, wherein said body and cover are of the same elemental material.

Claims 8-10:

None of the documents cited in the Search Report disclose a cushion for a patient interface adapted to supply gas to a patient comprising a cushion body having an outer cover, and an outer sealing sheath, wherein the cushion body is detachable from the outer sheath and the patient interface.

Claims 11-16:

None of the documents cited in the Search Report disclose a mask adapted to deliver gas to a patient comprising a cushion body wherein at least a portion thereof has a plurality of adjacent voids.

INVENTIVE STEP (IS):

Claims 1-7:

Because the subject matter of all the claims is totally disclosed by the documents cited under "novelty", the subject matter is considered to be obvious in view of those documents.

Claims 8-10:

The subject matter of these claims is not rendered obvious in view of the teachings of any prior art documents taken in combination or in combination with common general knowledge.

Claims 11-16:

The subject matter of these claims is not rendered obvious in view of the teachings of any prior art documents taken in combination or in combination with common general knowledge.

INDUSTRIAL APPLICATION:

The claims define subject matter that would be suitable for industrial application.
